## SALE OF GRADE "C" MILK IN CITY PROHIBITED BY BOARD OF HEALTH

### Adopt Amendments to Sanitary Code Making it Necessary for Producers to Maintain Ice Houses—Contagion Hospital Needed Says Health Officer—To Inspect City Schools.

Adopting amendments to the sanitary code prohibiting the sale of grade "C" milk in Kingston, and making it necessary for all milk producers selling milk here to maintain ice houses; directing the health officer to inspect the city schools and to report back as to sanitary conditions; and referring the matter of the city maintaining a contagion hospital to a committee, were some of the important matters taken up at the regular monthly meeting of the board of health Tuesday evening at the city hall.

Mayor Morris Block presided, with Commissioners Norwood, Kaufman, McBride, Hahn and Day present. The annual reports of the officers of the board were read and filed. The reports will be found elsewhere.

#### School Inspection.

A communication was read from the board of directors of the Chamber of Commerce calling attention to the recent promotional survey of Kingston in which it was stated that schools No. 2, 4 and 8 were unfit for school purposes, and requesting the board to have the schools of the city investigated by the health officer and to report his findings to the health board and also to the education board.

After some discussion, Dr. Norwood moved that the health officer be directed to make such an investigation and report back at the next meeting of the board. At Dr. Connelly's request the sanitary and plumbing inspectors were also made part of the committee on investigation.

#### Quarantined Family Supplies.

Dr. Connelly brought up the matter of supplying quarantined families with supplies, and after a general discussion by members of the board the health officer was given power to investigate all cases where relief was requested and to take the matter up promptly with the purchasing committee which would supply whatever was necessary when desired by the health officer.

#### No Grade "C" Milk.

Commissioner McBride brought up the matter of adopting some amendments to the sanitary code. These amendments had been read and approved at the December meeting of the board and were now up for adoption or rejection.

In brief, the amendments prohibited the sale of grade "C" milk in Kingston; made it necessary for all milk producers desiring to sell milk in Kingston to maintain their own ice houses, and provide for the proper refrigeration of their milk.

The ice milking is along the same lines taken last summer by the health board of New York city, which compels milk producers whose milk is handled in that city to maintain ice houses and keep on hand two tons of ice for each cow.

The amendments were unanimously adopted. Before going into effect they will have to be printed in the city's official papers, The Freeman and the Leader. This was ordered attended to.

#### Need Contagion Hospital.

Dr. Connelly before presenting his annual report to the board, called attention to the fact that the city has no place at the present time in which smallpox or other contagious diseases could be cared for. He said that if a case developed in a hotel or boarding house the city city had no place to remove the patient to. He said, was one of the most important questions that had come before the board for action. There had been talk about it for several years, but no definite action had been taken.

bringing all milk dealers in our city to understand that their places of distribution of milk must be kept clean and protected from contamination from flies.

Since July we have had 22 cases of typhoid fever, two being non-typical with three deaths. Typhoid fever is as you know more prevalent in the fall than during the spring and winter months. In all these cases we have endeavored to trace the source and if possible to eradicate the same.

In my opinion the Board of Health was very fortunate during the recent smallpox cases in securing the services of some one to care for the patients. Should we have a case of smallpox or even scarlet fever in a boarding house or hotel, where are we to take them? The time has come when the city should have a contagion building to be used in case of emergency.

Mayor Block before the board adjourned announced that the committee of 1923 were reappointed to serve during 1924.

## Butler Making Phila. Clean

### Gambler, Bootlegger and Immoral Women Seek Other Localities—Marine Policeman Says He's Just Started.

Philadelphia, Jan. 9.—A "leather neck" turned "copper"—and today Philadelphia's nationally famous tenderloin is closed. Speak easies are locked, brothels have moved out, bookmakers have sought other cities, vice has capitulated.

When Brigadier General Smedley Butler, of the United States Marines, Philadelphia's new director of public safety, loaned by President Coolidge for one year for an attack on the city's vice and crime, "turned in" at dawn today the city was cleaner than it had been for years.

The expeditious of crime was in full swing at daylight. Two of the city's most notorious gamblers caught a boat for Havana during the night. Scores of "boozie joints" displayed "for rent" signs for the first time in years. "The old Eighth ward," made famous in song and story, was practically deserted.

Butler declared, as he retired to the army club he had ordered placed in his office at city hall, "Philadelphia, like Rome, can't be cleaned in a day."

The marine copper declared real war. "I have given the bootlegger the barlot and the drug peddler 48 hours to get out of town," General Butler said. "Midnight tonight will be the zero hour. After that squads will batter down doors and the patrol wagon will run its wheels off it necessary."

During the night General Butler's squads made 21 arrests—the majority women.

General Butler has turned down a \$100,000 bribe, defied a threat of death, has become "one of the boys," playing a game of pitch in a station house back room.

## CO-EDS MAKE DIVEST COLLEGE OF CORNELL

By Telegraph to The Freeman.  
Ithaca, N. Y., Jan. 9.—There is less drinking of intoxicants at Cornell University than at any other large institution in the United States, and this is due to the activities of the girl students, according to Lt. Theodore H. Tweten, proctor. Tweten was formerly a lieutenant of police in Philadelphia.

## Investigating Clermont Fire

### Which Damaged Building \$800 and Stocks an Unestimated Sum—Started in Closet of Room Claimed to Have Been Unused Since New Year's Night.

Timely discovery of a fire in a closet on the second floor of the Clermont building, formerly known as the Crosby building, at the corner of Wall and John streets prevented a disastrous conflagration in the heart of the uptown business section about eleven o'clock Tuesday night.

The fire apparently had started in the closet, which opens from a large room used by the uptown colored people for dances, which had not been in use since New Year's night, according to the statements made by Theron B. Mower and Edward Fitzgerald, who rent the room, but in which there had been considerable "racket," according to employees of Benjamin Fein, who conducted the New York Sample Shop on the ground floor, directly beneath the colored folks' dancing room.

The damage to the building amounts to about \$800. There is slight damage to the property contained in the dance room, or adjoining kitchen rented by Messrs. Mower and Fitzgerald for their dances and social affairs. Considerable damage from smoke and water resulted to the stock of the New York Sample Shop and to the stock of Joseph Kirschner's Specialty Shop, adjoining, and some smoke also seeped through into Abram M. Nathan's Fashion Shop, occupying the corner store of the building. The chop suey restaurant on the second floor and E. W. Hathaway's engineering office, adjoining, suffered very slight damage from smoke.

The fire was discovered a few minutes before 11 o'clock by three members of a vaudeville troupe who had been performing at the Kingston Opera House, who had gone to the King Sun Lo Chop Suey Restaurant after the close of the evening performance. They noticed smoke, and asked the Chinese waiter whether anything was burning in the kitchen, and when he reported everything to be serene there, they went into the hallway. Through the glass panels of the two doors entering the dance room they saw the glow of flames and promptly broke open one door. They called to the Chinaman to bring them water, but the smoke was so dense they could not carry the pails more than a few feet into the room and then throw the contents in the direction of the flames, ten or more feet away.

The rush of air following the breaking of the door gave impetus to the flames which a few seconds later broke through a rear window and were seen by pedestrians on Crown and John streets, who turned in an alarm from Box 53, Wall and John streets. The firemen took a line of hose through one of the front windows but the smoke in the room was so dense they had to fight from the window for some minutes. Then, as the smoke cleared, they were able to get at the fire to better advantage.

The room in which the fire occurred extends from front to rear of the building, on the side nearest to the court house, and there is also a large room adjoining, formerly used by Prof. George H. Muller as a music studio, which is fitted up as a kitchen. At the rear of the room is a stairway extending to the third floor, where it enters one of the small rooms, opening off Clermont Hall and for many years used as an ante-room to the large hall formerly used by Franklin Lodge, Knights of Pythias. The fire started in a closet under the stairway and worked its way into the partition and thence along the floor timbers of the third story towards the center, and also burned through the stairway. The closet was used only for the storage of a bag or two of coal for heating the hall when colored dances are held there, and there was also a small quantity of kindling wood there.

Metal ceilings in the stores occupied by Mr. Fein and Mr. Kirschner prevented the stores from being flooded, the water escaping principally by way of the side walls to the ground floor and cellar. In the New York Sample Shop, however, there was enough water that leaked through the ceiling to soak thoroughly all the stock exposed on tables and counters and to soak the exposed parts of costumes in cases. The same water damage occurred to a less extent in Kirschner's Specialty Shop. There was no water damage to Nathan's Fashion Shop, but smoke came through the walls from the Kirschner store and left an unpleasant odor un-

## Bank Directors Decline to Serve

It is understood that several of the directors who were re-elected at the Rondout National Bank have declined to serve, among them being David Terry, A. S. Staples, W. C. Kingman and John Hiltelbraut.

## Burger Now With Kingston Trust

Munroe Burger, well known local banking man, is now with the Kingston Trust Company at the central branch on Broadway. Mr. Burger for sixteen years was with the Rondout National Bank, serving that bank for the last two years as cashier. During the years Mr. Burger had been with the downtown bank he had made an enviable reputation as one of the best posted men in local banking circles.

## MAN SUFFOCATED AND HIS WIFE BADLY BURNED

By Telegraph to The Freeman.  
New York, Jan. 9.—Evans Sheffield, a street cleaner, was suffocated and his wife, Mary, overcome by smoke and severely burned in a fire that early today swept their basement home in a six story tenement in Brooklyn. Mrs. Sheffield was taken to a hospital in a serious condition. The members of 20 families living in the tenement were aroused by pedestrians who noticed smoke issuing from the basement windows.

## VENIZELON'S HILINNESS DUE TO PLOTTER'S POISON

By Telegraph to The Freeman.  
London, Jan. 9.—An attempt has been made to assassinate former Premier Eleutherios Venizelos of Greece with poison according to a dispatch received here today from Carlsbad, quoting advice received by newspapers in that city from Athens. Venizelos was stricken last Saturday just after being elected president of national assembly at Athens.

## Senators Immunity Ended.

By Telegraph to The Freeman.  
Madrid, Jan. 9.—The king today signed the decree abolishing parliamentary immunity for life of senators.

## Italy Suffers From Cold.

By Telegraph to The Freeman.  
Rome, Jan. 9.—Several deaths have occurred in Northern Italy, due to the severe weather.

At the store had been given a thorough airing this morning. The amount of damage to the stocks in the Fein and Kirschner shops cannot be estimated until the proprietors have made an inventory of the goods. The nature of the goods carried by them requires that they shall be free from smoke and water in order to be saleable. The water did not damage the Chop Suey restaurant, whose food supplies had been undamaged by the smoke according to anticipation of the noon trade. Mr. Hathaway's engineering office and contents were undamaged either by smoke or water except a few sundry items caused by smoke. The decorations in Clermont Hall, which were quite elaborate, were ruined by smoke and paint, varnish and wax will be required in fairly substantial quantities to restore the hall to its former condition.

The Clermont building, which for many years was owned by the Edward Crosby Estate, was sold several years ago to Nathan Levine and Nathan L. Feldman. Recently Levine sold his interest to Feldman.

Chief Chipp of the fire department is investigating the fire to determine its cause. The dance room rented by Messrs. Mower and Fitzgerald had been unoccupied, according to their statements, since New Year's night. They say they do not know of any other persons who had keys to the rooms and if there was a "racket" in the rooms Tuesday afternoon, they are ignorant of it. He could have been there; that they were both at work during the afternoon and evening. They say that the lock on the window opening on the fire escape at the rear of the building had been broken for some time and it would have been possible for a person to gain entrance that way.

## To Ask Legislature To Compel Publication of Names Of Those Who Received Tubercular Cattle Money

### Cuvillier Demands Explanation of How Farms and Markets Council Spent \$2,220,000 in Four Months.

By Telegraph to The Freeman.  
Albany, Jan. 9.—A resolution demanding an explanation of how the state farms and markets council spent \$2,220,000 in four months last year is being prepared by Assemblyman Louis A. Cuvillier, New York Democrat, and will be offered at next Monday night's session of the legislature.

"It does not seem possible that this amount of money could be spent on tubercular cattle in such a short time," said Cuvillier. He added: "Insinuations have

## JURY SECURES MERCY FOR YOUTH CONVICTED ON FATHER'S TESTIMONY

By Telegraph to The Freeman.  
Jersey City, Jan. 9.—Alvin Anderson, devoted churchman, swore away the life of his son Albert, charged with slaying Harry C. Moore during a hold-up.

Gripping the witness chair till his knuckles showed white the father told of visiting his son in jail. "I asked him 'Albert did you really do it? Or are you trying to cover up somebody as you have done other times?'" "Albert looked me right in the eyes and he said, 'No father this time I really did do it. I killed.'" The jury found young Anderson guilty but recommended mercy. The recommendation saved Albert from the electric chair. He will be sentenced later.

## Lahl President of Fire Board

At the annual meeting of the board of fire commissioners held Tuesday evening at the Central Fire Station the board elected Charles Lahl as president. The board also reappointed Ray Whitlock as clerk. Fire Chief Chipp submitted his annual report, which will be found in full elsewhere.

## FRANCE WITHDRAWS MORE TROOPS FROM RUHR

By Telegraph to The Freeman.  
Essen, Occupied Germany, Jan. 9.—French troops today evacuated Bochum and Wattenscheid on the northern edge of the Ruhr district, leaving only gendarmes behind. This was the third decisive step in the withdrawal of soldiers, as part of the policy of invisible occupation.

## DERAILMENT ON W. S. DELAYED ALBANY TRAIN

Two freight cars went off the West Shore tracks at West Athens this morning early tying up traffic for some time. The passenger and paper train from Albany due shortly after 6 o'clock this morning did not arrive in Kingston until about 10 o'clock.

## Republican Women to Meet.

By Telegraph to The Freeman.  
New York City, Jan. 9.—Republican women leaders from every county in the state will gather in New York on Friday, January 11 for an all day conference with members of the Republican Women's State Executive Committee. The meeting will take place in the Women's National Republican Club, 38 West 29th street, Manhattan.

## Sent Boys Away.

Deputy Sheriff Ellsworth has just returned from the State Industrial School near Rochester, where he had taken Harold Nelling and Henry Gas, two young boys who had been caught breaking into a boat house at Wilbur, and who were sentenced to that institution until discharged by law by County Judge Fowler in children's court.

## Harry Lein Receiver.

Judge Knox in U. S. district court in New York City Tuesday appointed Harry Lein receiver in bankruptcy for Joseph Berger of this city, under a bond of \$2,000. Berger, who was a dealer in general merchandise, filed a petition in bankruptcy with liabilities of \$11,460; assets, \$5,000.

## Afghans Taken Seriously.

By Telegraph to The Freeman.  
Moscow, Jan. 9.—The Anglo-Afghan situation is most serious. Anglo-Indian forces were today reported concentrating near the Afghan passes.

## Snow in London.

By Telegraph to The Freeman.  
London, Jan. 9.—A six inch fall of snow covered London today. The storm was so severe the newspaper called it a blizzard.

## Strike in Dusseldorf.

By Telegraph to The Freeman.  
Dusseldorf, Occupied Germany, Jan. 9.—A general strike was proclaimed here today, tying up all industry.

## KINGSTON'S FIRE LOSS IN 1923 WAS \$72,950.16; 288 FIRE CALLS

### Fire Chief Chipp Asks for Eight Additional Men in Paid Fire Department, and Recommends Purchase of Thawing Device for Thawing Out Frozen Hydrants—The Report in Full.

Kingston's fire loss during 1923 amounted to \$72,950.16, according to the annual report of Fire Chief Rodney A. Chipp submitted Tuesday evening at the annual meeting of the board of fire commissioners at the Central Fire Station. There were 288 fire calls during the past year. The chief also recommends the addition of eight paid men to the fire department, and the purchase of a Russ hydrant thawing device for thawing out frozen fire hydrants.

Fire Chief Chipp's report in full follows:

In compliance with Chapter 704 of the Laws of 1907 and in order to comply with Chapter 641 of the Laws of 1915 I have the honor and pleasure to submit to you a condensed report from my monthly reports that I have submitted to you for your consideration, this report is only a synopsis of my monthly reports from December 31, 1922 to December 31, 1923.

I would also refer you to my annual inventory hereto attached:

**PAID FORCE OF THE DEPARTMENT.**  
Rodney A. Chipp, fire chief.  
Joseph L. Murphy, deputy fire chief.

**CENTRAL FIRE STATION PUMPER.**  
Wright Maines  
Edward M. Gillen  
Charles V. Brown  
Irving Eganor

**HOOK & LADDER TRUCK.**  
John L. Strubel  
John J. Hoffman  
John Heppner  
Frederick M. Levarich

**WILLOWYCK FIRE STATION.**  
James L. Conlin  
William Richter  
Harry McElrath  
Farrall F. Finkle

**CORNELL FIRE STATION.**  
Edward M. Murelli  
Clarence Barber  
William J. Geary  
George Brown

**FIRE ALARM.**  
Marshall G. Miller, Superintendent  
I would state that paid stations and volunteer fire houses are authorized except Twaalskill Hose Co. and Rescue Hook & Ladder Co.

**FIRE CALLS AND FIRE LOSS.**  
Fire calls by month showing losses on which insurance was paid and estimated loss not insured, number of fire calls and causes of each fire.

**January, 1923.**  
Number of fire calls and their causes:  
Blow torch 1  
Chimney fires 5  
Gasoline fire 3  
Gas heater 1  
Hot coals 1  
Overheated chimney 1  
Oil tank 1  
Overheated heater 1  
Overheated oil stove 1  
Overheated coal stove 1  
Smoke from heater 1  
Upsetting of hot coal stove 1  
Unknown 1

**February, 1923.**  
Burning rubbish 1  
Cigarettes 3  
Chimney fires 5  
Defective chimneys 2  
Dump fires 1  
Ignition of gasoline 1  
Sparks from locomotive 1  
Sawdust fire 1  
Unknown 3

**March, 1923.**  
Burning matches 1  
Chimney fires 1  
Cigarettes 1  
Defective chimneys 1  
Dump fires 1  
Gas fire 1  
Overheated furnace 1  
Smoke from heater 1  
Soft coal 1  
Sparks from chimney 1

**April, 1923.**  
Automatic fire bell 1  
Blow torch 1  
Burning rubbish 1  
Blow torch 1  
Burning leaves 1  
Boy and matches 1

**May, 1923.**  
Boy setting load on fire 1  
Burning rubbish 1  
Chimney fire 1  
Candle and matches 1  
Cat on telephone pole 1  
Defective light wire 1  
Dump fires 4  
Grass fires 1  
Hot coals 1  
Lighting 1  
Smoke from stove 1  
Pitch pot 1

**June, 1923.**  
Automobile 1  
Burning rubbish 1  
Boy and matches 1  
Dump fires 1  
Electric light wires 2  
Fire crackers 1  
Ignition of gasoline 1  
Out of city 1  
Unknown 1  
Sparks from locomotive 1

**July, 1923.**  
Automobile 2  
Blow torch 1  
Brush fires 5  
Boy and matches 1  
Cigarettes 2  
Chimney fire 1  
Dump fires 5  
False alarm 2  
Fireworks 1  
Gas mantle 1  
Grass fires 6  
Hot ashes 1  
Ignition of rubber cement 1  
Ignition of dust 1  
Ignition of turpentine 1  
Ignition of paint remover 1  
Incendiary supposed 1  
Oil stove 1  
Old rubbish 2  
Smoke house 1  
Sawdust 1  
Tar kettle 1  
Sparks from match 1

**August, 1923.**  
Automobile 2  
Burning grass 1  
Boys and matches 1  
Cigarettes 1  
Dump fires 6  
Incendiary supposed 1  
Ignition of gasoline 2  
Sparks from locomotive 1  
Sawdust fire 1  
Unknown 3

**September, 1923.**  
Chimney fires 3  
Defective electric light wire 1  
Dump fires 2  
Electric light wire 1  
Hot ashes 1  
Ignition of roof cement 1

**October, 1923.**  
Automobiles 5  
Boiler back fire 1  
Boys and matches 1  
Chimney fires 3  
Cat on roof 1  
Dump fire 1  
Defective chimney 1  
Defective wire 1  
Explosion of oil lamp 1  
False alarm 1  
Gas jet 1  
Grass fire 1  
Ignition of dust 1  
Ignition of gasoline 1  
Ignition of paint 1  
Ignition of soft coal 1

**November, 1923.**  
Automobile 1  
Blow torch 1  
Burning rubbish 1  
Blow torch 1  
Burning leaves 1  
Boy and matches 1

**December, 1923.**  
Automobile 1  
Blow torch 1  
Burning rubbish 1  
Blow torch 1  
Burning leaves 1  
Boy and matches 1

**Sure Relief  
FOR INDIGESTION****A THREE DAYS'  
COUGH IS YOUR  
DANGER SIGNAL**

Chronic coughs and persistent colds lead to serious trouble. You can stop them with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with twofold action: it soothes and heals the inflamed membranes and kills the germ.

Of all known drugs, creosote is recognized by the medical fraternity as the greatest healing agency for the treatment of chronic coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the inflamed membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and destroys the germs that lead to serious complications.

Creomulsion is guaranteed satisfactory in the treatment of chronic coughs and colds, catarrhal bronchitis and other forms of throat diseases, and is excellent for building up the system after colds or the flu. Money refunded if any cough or cold, no matter of how long standing, is not relieved after taking according to directions. Ask your druggist, Creomulsion Co., Atlanta, Ga. (Adv.)

814 WALL STREET.  
Jobbing Given Prompt Attention.

**Ward Becomes  
Ranking Member**

With the organization of the house of representatives perfected and its committees personnel completed, Congressman Charles B. Ward of this district becomes the ranking member of the major committee on agriculture.

Congressman Ward's rise has been brought about in eight years, for in 1915 he was second from the bottom among the committee's 22 members, and of that membership only Mr. Ward and Chairman Gilbert N. Haugen, of Iowa, remain, although Thomas L. Rubey, of Missouri, who was then on the committee, has been renounced after several years' absence from it. The house at that time was Democratic and Mr. Ward was, therefore, on the minority side. He was selected for the place by the late Congressman James R. Mann, of Illinois, one of the most powerful leaders and ferocious debaters in congress. The last man on the committee at that time was the late J. Kahlo Kahanizade, of Hawaii, who died during the closing days of the last congress.

In the last congress Mr. Ward was the second member of the committee, the ranking member being Representative James C. McLaughlin of Michigan, who this session was assigned to the committee on ways and means.

The owner and personal supervisor of a large farm of his own in Sullivan county, Congressman Ward has brought to the committee on agriculture a sympathetic understanding of the problem of the farmer, and during his period of service has supported every bill designed to promote agriculture that has come before the committee. He has been constantly in touch with farmers and agriculture in his district, and has done much to raise the standard of farm conditions.

The chairman of the committee on agriculture, Mr. Haugen, has served in the house since 1898. The other members of the committee for this session are: Republican—Charles B. Ward, N. Y.; Fred S. Purnell, Ind.; Edward Voigt, Wis.; M. O. McLaughlin, Neb.; J. N. Tinker, Kans.; Thomas S. Williams, Ill.; J. H. St. Clair, N. D.; Charles J. Thompson, Ohio; Frank Clague, Minn.; John D. Clarke, N. Y.; John C. Ketcham, Mich. Democrats—James B. Aswell, La.; David H. Kincheloe, Ky.; Marvin Jones, Tex.; F. B. Swank, Okla.; Hampton P. Fulmer, S. C.; Thomas Rubey, Mo.; George W. Johnson, W. Va.; Thomas A. Doyle, Ill.; John McSwaney, Ohio; William P. Jarrett, Hawaii.

**Mary Succeeds  
on Main Street**

By LAURA MILLER

**OUT WHERE THE WHEAT  
BEGINS**

The secretary-treasurer of a farm loan association in St. Paul, Kan., doesn't properly belong in any category of Main Street women. For her back yard contains 318 acres. The work for the farm loan association, and other work for the Big Island school board are casual tasks while the farm is literally the big job.

But Susie Gibbons, an orphan, who has certainly found success by either man's or woman's measuring tape, has accumulated opinions that Miss Town-Bred or Miss City-Born may well ponder.

As to where a girl should seek success—"depends on what kind of backbone the girl has," Miss Gibbons says laconically. "The real question is whether the girl intends to make good, not the size of the town that happens to be her home."

And as to the qualities that have made for her own success—"keeping perpetually busy" is one part of the prescription. Getting along well with people is another essential ingredient even for a farmer, though Miss Susie Gibbons isn't contented enough to claim the credit due her. Instead she explains: "I have had my housekeeper fifteen years. She is an angel. My farm manager has been here seven years. My friends are veritable Gibbonists. It seems to me the chief tribute they've paid my father—who was the best dad on earth—has taken the form of watching my welfare."

But it's when she explains why she couldn't be hauled or coaxed or driven to life in the big city that Susie Gibbons truly waxes eloquent. "Well! I don't have to wake up in the morning and hear the pattering feet of the family above. No elevated trains—where humanity is packed in like stock in Western cattle cars. No iron-clad hour for lunch. No dictaphones (thank the good Lord). No coming out of an office at 5:30 to join in a mad homeward rush, with all the lovely day gone. No prisonlike existence within granite walls."

**THE  
OFFICE CAT**

By Junius

**Talk About Luck.**

A man who believes in the old saying, "See a pin and pick it up, and all that day you'll have good luck," saw a pin in front of the post office the other day. Bending down to get it, his hat tumbled off and rolled into the gutter, his eye-glasses fell and broke on the pavement, his suspenders gave way behind, he burst the buttonhole on the back of his shirt collar, and he all but lost his new front teeth. He got the pin.

When some wealthy people brag that they have the best of everything they are not talking about manners.

Keep out of trouble. No matter what the court may decide there is a large jury on the outside that will believe the charges.

The boy stood on the burning deck. And he cursed with might and main.

He had a right to, for, by heck, He was paroled again.

If you will work hard and save money, you can retire after a while and be bored to death.

History records not a single instance of a man getting rich waiting for the whistle to blow.

Tommy was being taught Christian forbearance to cure him of the habit of cursing, developed to a high degree in one so young. He was in the cellar getting some apples, when the lights went out.

22 @ 44 \$ 18 !!! @ @ @ @ @

22 47b\*\*\*

His horrified mother ran to the head of the stairs and cried: "Tommy, Tommy, have the patience of Job."

"Patience of Job, hell, Jo's never got his fingers in a damned rat trap."

The "Back to Nature" movement is nothing new. The majority of people have always turned their back to it.

A little ruffle.  
A yard of silk;  
A little skin,  
As white as milk;  
A little strap—  
How dare she breathe!  
A little cough—  
"Good evening, Eve!"

John D. Rockefeller made his money out of oil and Henry Ford made his out of the car.

**MUTTON AND LAMB AS FOOD**

Among the Most Healthful, Nutritious and Palatable of Meats, Say Experts.

The production of sheep for wool alone is rapidly on the wane in the United States. More and more emphasis is being placed on the production of lamb and mutton for the table, although only 3.7 per cent of the meat consumed by the average American for the last five years was lamb or mutton. This proportion should be much larger, according to the United States Department of Agriculture, as mutton and lamb are among the most healthful, nutritious and palatable of meats.

The reason for the limited use of lamb and mutton throughout the central section of the United States probably had its origin in the days of the development of the great corn-belt region west of the Appalachian mountains, department workers say, according to the New York Times. At that time sheep owned by the settlers of that region came largely from the North Atlantic states and had been developed almost without exception for wool production, regardless of the inherent flavor of the meat.

The flesh of these animals was no doubt tough, not so palatable as other meats and, possibly owing to the crude methods of caring for it, much of it was unfit for use. As this section of the country has been somewhat slower in the development of mutton breeds of sheep and as much prejudice against the meat has been handed down from generation to generation there has developed the idea that the flesh of all sheep is not appetizing and carries peculiar flavors.

**SNOWSHEDS WILL BE RAZED**

Picturesque but Monotonous Features of Mountain Travel Are to Disappear.

The snowsheds along some of the railroads through the Sierras are being taken down, one stretch measuring 14 miles in length. Some sort of snow-fighting equipment will be used instead. These enormous structures were novel at first, but when it came to riding through them, mile after mile, passengers grew tired of them and, besides, they wanted to see the scenery, remarks the Providence Journal.

Some of these sheds were built in localities where the country was somewhat lacking in picturesque features, but at the same time passengers were always trying to get a glimpse through the window-like openings which occurred at regular intervals, but this was impossible as the movement of the train precluded anything

like a glimpse of the country—noting but a flash of light.

Consideration of the wishes of passengers, coupled with the fact that the maintenance of the sheds has been a serious item of expense, prompted the railroad people to dispense with the long snowsheds.

**School for Smokers.**

A smoking master has just opened a school in London. He teaches the art of smoking cigarettes and cigars. It appears it is not so simple as is generally supposed. For instance, really to enjoy a cigarette, he says, you must not pull at it like a school boy, nor yield to the vulgar taste of swallowing the smoke. Once the cigarette is in your mouth it must not move again, you must only slowly draw in your breath. The best time in his opinion to smoke a cigarette is before breakfast and you must make it last like a dream. The London master makes his last from twenty-five to thirty minutes. To smoke and

also drink alcohol is a heresy. Alcohol spoils the taste of tobacco, but coffee taken with the cigarette is perfection. People who smoke one cigarette after another without stopping are nothing but savages. So says the London professor.

**Meissen, a City of Porcelain.**

Of all the quantity beautiful cities of Germany, Meissen on the Elbe, pride of Saxony, occupies a unique place of its own, being built almost entirely of porcelain. In 1740 the first royal porcelain factory was established on the hilltops overlooking the Elbe. In the fifty years that immediately preceded the World war the municipality and individual wealthy citizens were able out of their accumulated wealth to substitute porcelain for brick and stone in the construction of buildings, so that now one-half of the homes, together with several factories and public edifices, are constructed almost entirely of this translucent and very expensive material.

Moses and the Bulrushes.  
Opposite Cairo lies the island of Roda, where, according to Arab tradition, Pharaoh's daughter found Moses in the bulrushes. At the southern extremity of this island the Nile has been measured by the Cairenes for 1,000 years. It is a square well with an octagonal pillar marked by cubits in the center.

It is interesting.  
It is an interesting fact that a man who chooses his work because he loves it, often chooses a kind at which he can make no money.

## Chic Scarf Chief Paris Style Note

Accessory Is Regarded as  
Necessary Decoration  
on All Dresses.

The scarf, both as an accessory and a component part of the fashion costume, is a dominant idea. Every important dressmaker, notes a Paris fashion correspondent, in the New York Tribune, is using the scarf in many forms, attached to or cut in with the dress with which it is worn. Chanel, Vionnet, Cheruit, Lanvin, Boulangier, Renee, Madeleine, Madeleine, Callot, Jenny and a number of other dressmakers with whose followings show models in both day and evening dresses and day and evening coats in which the scarf is the dominant idea.

Ingenuity has been put to the extreme in the cutting of these new scarf effects. Many of them are a part of the garment. Vionnet extends the scarf to form scarf ends. She draws into girdle fullness certain of her day dresses by means of long scarf ends cut in one with the body fullness.

Chanel attaches scarfs to the back of her dresses in yoke-like form. She also adds to both her day and evening dresses long scarfs of silk or chiffon separately attached at the shoulder or collar of the dress. Often these scarfs are in contrasting color. The long end may be left to trail on the floor from the shoulder to a length of more than a yard or the same scarf may be wrapped about the neck and shoulders and left to fall gracefully from one side or the other, according to the fancy of the wearer. Sometimes scarf ends begin as a flounce or a wide bias band on the skirt, the long free end being left to be caught up and passed around to the front. Chanel has a lovely model of this kind in which the scarf is vivid emerald green, the only touch of color in an otherwise all black dress.

In sports wear the scarf is equally important, as every coat or sweater has its matching scarf whether it be knitted or made from a fabric. The separate scarf of brilliant-hued printed silk took all the autumn resorts by storm and one feels sure from the preparation now in hand of beautiful models of this character that no outfit will be complete this winter without a scarf of some sort, either as an accessory or component part.

## Leopard Cat in Demand for Short Sport Coats

The well-known spotted fur, leopard cat, is in favor for the short sport coat. The model is banded and colored with beaver.

## Pongee One of Most Practical of Silks

Pongee is a silk, but it is made of "wild silk," and so is not so fine as fabrics made from cultivated silk, says the Kansas City Star. The wild silkworm is not cured for as the domesticated worm is, and so the silks are much cheaper. The finishing process is less expensive, too, because the wild silks do not take dyes well, so are usually finished in their natural color. The cocoons are a light brown or tan color, so the threads are tan color also.

The silk is coarser, harsher, and more irregular in texture than the cultivated silks.

You can distinguish these fabrics of "wild silk" by the irregular threads in the weave. This texture is very attractive, but the irregularities have a habit of catching on uneven surfaces and of "roughing up" badly. Pongees are more regular in their weaves than any of these fabrics, and so are much more satisfactory in this regard.

When pongee is markedly harsh to the touch, it is probably because some of the gum from the raw silk has been left in.

There is also a cotton pongee. It is mercerized cotton woven and finished to resemble the silk pongee, but it is thicker, and not so good looking. Like all mercerized cottons, it is exceedingly durable.

Pongee is one of the most practical silks we buy. It wears well, washes easily, and in its natural color does not show soil readily. The name pongee is said to be derived from the Chinese word "pun-shih," meaning a native or wild silk. The finer kinds, bleached, dyed or figured after importation, are known in trade as "China silks."

If pongee is sponged before being made up it will not spot.

## Three-Piece Suit Will Solve Service Problem

The woman who must be somewhat careful in her expenditure for clothes shows her wisdom and cleverness if she builds her winter wardrobe about her suit.

In this modern era when most women are so active, the suit is probably the costume in which they are most frequently seen by the general public. Of course, suits have varied classifications. But if one is an astute follower of the mode it is quite possible to select a model that is dignified enough for occasions rather ceremonious in character, and yet not so formal for the morning shopping expedition and the casual luncheon party.

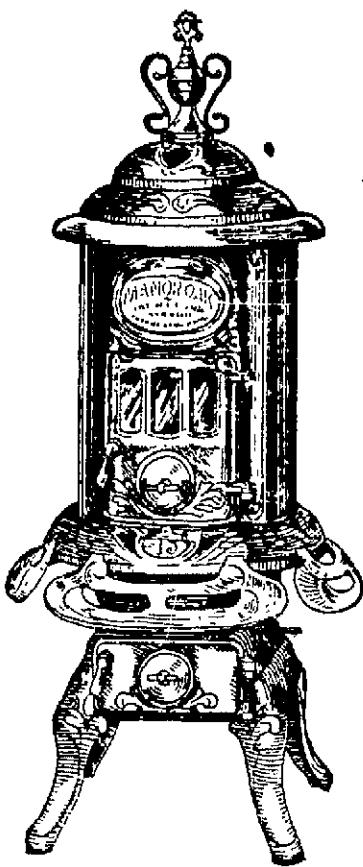

The question of how to appear to advantage upon all daytime occasions is answered by the three-piece suit. Extremely simple and smart in line when the coat is worn, it may take on a decidedly elaborate aspect when the coat is removed. Underneath is either a really beautiful one-piece frock or a costume blouse of handsome material. These blouses have never been more beautiful.

For instance, there is one of pale silver cloth, sleeveless, and with rounded neckline. On the front of the blouse there is a curious Chinese motif done in intricate stitches and revealing a most artistic blending of colors.

The Bamboo Chairs. Bamboo furniture needs slightly different treatment from the ordinary hardwood articles, the finer requiring "feeding" from time to time in order to prevent its cracking from excessive dryness. It should be rubbed regularly with a mixture of linseed oil and turpentine, applied with a flannel, followed by a brisk polish with soft rags. Bamboo furniture should also be exposed as much as possible to the air, and kept as far away from the fire as convenient.

A Prisoner's Observation. Bold-Headed Magistrate—"If half of what the witnesses have said against you is true, your conscience must be as black as your hair." Prisoner—"If you judge a man's conscience by his hair, you cannot have a conscience at all."

## Obregon on Western Front

Where He Will Probably See Rebels  
and Federal Light Most Important  
Battle of Present Revolt.

By Telegram to The Freeman.

Mexico City, Jan. 9.—President Alvaro Obregon will be a personal observer of the decisive battle with the rebel troops on the Jalisco front, it was learned from the war office today.

The president has gone to the western front to inspect the federals and will go into action against the rebels as soon as they have been equipped with the arms and munitions purchased from the United States government.

The fighting near Leon, in the state of Guanajuato, has died down but the troops are moving closer to the Jalisco border making it more likely that a decisive battle soon will be fought there.

It is a significant circumstance that it was in this locality that the revolutionaries under Francisco Villa were defeated. Federal troops on the southern front will be supervised by War Minister Serrano.

Serrano plans to make his headquarters at San Marcos. Plans are under way to undertake two offensives against the rebels at the same time—one on the southeastern front, the other upon the western front.

Obregon has about 40,000 well

drilled and equipped troops in the field.

Airplanes purchased from the United States will move in advance of the troops.

General Joaquin Amaro will be in active command of the federals upon the eastern front. General Eugenio Martinez will command the federals moving on Vera Cruz.

Owing to the destruction of railway lines the advance on Vera Cruz will be on foot. Cavalry under General Andrew Almazan is expected to play an important role in this movement.

Federal generals fear that some of the mountain tunnels on the road to Vera Cruz have been mined and that it would be unsafe to use those portions of the railway lines that were not destroyed. There are long and dangerous tunnels on both the Inter-Oceanic and Mexican Railway Lines leading to Vera Cruz.

Serrano predicts that the rebel forces holding Vera Cruz will be in flight within a week. He believes that lack of arms and munitions will force the rebels to give up.

The federals on both the southeastern and western fronts have delayed their movements until fresh supplies arrived from the United States frontier to facilitate their advance.

A Little Truth Is Dangerous.

"Errors, to be dangerous, must have a great deal of truth mingled with them; it is only from this alliance that they can ever obtain an extensive circulation, for from pure extravagance and genuine unmingled falsehood the world never has and never can sustain any mischief."

## Executor Heard in Brady Case

Nicholas F. Brady on Stand in Action  
Brought by His Sisters to Have  
Executors Removed.

By Telegram to The Freeman.

Albany, Jan. 9.—Nicholas F. Brady, one of the executors and trustees of the \$75,000,000 estate left by his father, the late Anthony N. Brady, took the witness stand again today when the hearing in the suit to have the Brady estate executors removed, was resumed before Surrogate George Laver.

The removal of Nicholas F. and James Cox Brady and the Central Union Trust Company of New York, as executors and trustees of the vast estate is being sought by Mrs. Carl Tucker and Mrs. Francis P. Garvan of New York, daughters of the late financier. They have filed objections to the accountings for 1919 and 1920 as made by the executors.

Former Governor Nathan L. Miller, of counsel for the executors charged the issues have been "framed" and that the present proceeding is nothing but a "trading expedition."

Counsel for Mrs. Tucker and Mrs. Garvan have charged that proceeds owned by the Brady estate have been dissipated by the executors. Surrogate Lawyer sustained a contention of former Governor Miller

that the executors can only be questioned during the present proceeding as to how the estate was handled during the years 1919 and 1920.

Former Governor Miller charged that "unfounded insinuations" had been made by the objectors, brought this sharp retort from George W. Wickesham, associated with Mr. Kresel as counsel for Mrs. Tucker and Mrs. Garvan.

"I don't like the statements of Governor Miller as to the motives of the beneficiaries. These beneficiaries believe these trustees have not properly performed their duties, and they seek their removal. Their purpose to show all the facts."

James Cox Brady is expected to follow his brother on the witness stand. The hearing may continue several weeks.

Beggar Pitted the Queen.

The recent celebration of Queen Wilhelmina's jubilee revives many stories of her youth in Florence, where she lived for a while with her mother. It is related that one day they were going along the Lung Arno, when they were accosted by a beggar. The queen regent wanted to push him, fearing that her daughter might catch some fearful disease, but the little queen, having a will of her own, insisted on stopping. She questioned the man in broken Italian believing herself quite unknown, and on proceeding gave him half a franc. He looked from the silver in his hand to her, and then back again, and at last said, with an air of importunate persistence: "So your majesty keep you as short as that! Poor queen."

## TO LET Mann's Hall

\$15 Per Night

More Than One  
Night Cheaper.

UNITED STATES DISTRICT COURT, Southern District of New York. In the Matter of Joseph Edgar Mann, Debtor. Notice is hereby given that on the 14th day of January, 1924, the above named Joseph Edgar Mann was duly adjudicated a bankrupt, and that the first meeting of creditors will be held at the office of the undersigned, between 11 and 12 o'clock, on the 14th day of January, 1924, at 100 Nassau Street, New York City, at 10 o'clock, at which time the creditors may file claims, and the debtor, elect a trustee, and the court will, at its discretion, order the hearing of such claims as may properly come before said meeting.  
Dated, January 9th, 1924.  
AMOS VAN ETLEN,  
Referee in Bankruptcy.

## Coat of Brown Woolen Mixture, Beaver Collar

For winter's blustery days, this warm, rough coat of brown woolen mixture, with its large beaver collar, will appeal to many women.

## How to Mend Linings in Backs of Your Shoes

When the linings at the backs of shoes begin to wear out, holes are apt to be made in the heel of the stockings and the uneven surface is also very uncomfortable for the wearer. Children's shoes are often torn in this manner. The best way to mend such a lining is to cut strips from old kid gloves and fasten them with glue into the backs of the shoes. There should be enough of the kid to go down under the inside sole, great care being taken to see that the strip is put in perfectly smooth. No attempt should be made to near the shoe until the application is entirely dry. A piece of kid fitted in this way is also a remedy for shoes that are a little too large. If necessary, two or even three thicknesses may be placed inside the back of the shoe.

## For the Party Gown.

Tulle is among the chic materials now being chosen for the young girl's evening gown. Several gowns of a beautiful gold shade draped over gold lace slips have been seen at smart gatherings.

<b>Total fire loss:</b>	<b>\$71,380.16</b>
Fire loss not insured	1,570.00
<b>Total fire loss</b>	<b>\$72,950.16</b>

I would at this time mention some of the largest fire losses during the year 1923.

On the afternoon of March 20, the department received a call from Box 78, found the roof afire on the south west wing of the Dr. Sahler Sanatorium, 61 Wall street. This fire did an insurance damage on buildings and contents to the amount of about \$11,363.

On the morning of August 29, the department received a call from Box 73 at about 3:20 o'clock. Found the fire under the roof of the Kingston Milk Product Creamery, Inc., 26 Down street. This fire caused an insurance loss on building and contents to the amount of \$12,736.57.

September 16, the department received a call from Box 91 at 11:20 a. m., the fire being a 2 1/2 story frame house of Samuel Hopkins at 28 Johnston avenue. The department was hampered some on account of low pressure of water until the pump got working. The roof burned off of this house with an insurance loss of about \$8,500.

I would also state that on the morning of December 25, about 1:19 o'clock, the department received a telephone call for a fire at the Kingston Dry Dock Construction Co., located on the Island Dock. At about the same time Box 25 rang in for the same fire. The fire proved to be in the hull of the steamship Marglanza. Found the hull a mass of flames from midship to bow. Firemen poured water in the hole until decks burned under their feet. It was like pouring water on an oil fire. Firemen had to move to rear of engine room and on deck with their screams. One-half of this hull was destroyed with a broker insurance. I understand, at about \$25,000.

I have reported to your honorable board from month to month all sickness, and accidents to men and apparatus, none of which were of a serious nature during the year.

Inspections, 1923.	
January	20

**Buildings and Equipment.**  
There was purchased during the year one 1,000 gallon triple combination pump from the American-LaFrance Fire Engine Co. and installed at Central Fire Station.

One Ford hose truck and installed at Excelsior Hose Co. Hurley avenue, and a number of other supplies as I would recommend in my requisition from month to month for the fire stations, apparatus and use in the department. 1,000 feet of 2 1/2 inch fire hose from the Eureka Fire Hose Company.

**Repairs.**  
The old 750 gallon pump sent to American-LaFrance factory for a general overhauling and upon its return July 5th was placed in service at Cornell Fire Station.

New metal roof placed on Cordis Hose Engine House.  
New concrete floor put in at Cornell Fire Station.  
Second hand heater put in at Union Hose House.

**Recommendations.**  
I would recommend that eight additional paid men be added to the fire force, two at Wiltwyck Station, two at Cornell Station and four at Central Fire Station that would give me three men on an apparatus which I would be of big help on arriving at a fire and these men would also act as relief at the different stations during summer vacations.

I would also recommend repairs to floor at Central Fire Station as soon as possible as the floor is in quite bad condition, that fire-wall above roof be pointed up with cement during the summer months, that blackboards be placed in fire stations with fire box calls on same. That roof and cornice at Cornell Fire Station be repaired. That cornice and bell tower be repaired at Wiltwyck Fire Station.

I would also recommend the purchase of a Ross Hydrant Thawing Device for thawing out frozen hydrants.

**Department.**  
I wish to extend my thanks to Rose-Forman-Rose, L. Barth & Son, Inc., and Eagle Hotel for the Christmas cigars sent the department and also the citizens of Kingston for magazines etc., donated to the department during the year.

The work in the department for the year has been most satisfactory and it affords me great pleasure to testify to the able assistance I have received from Deputy Chief Joseph L. Murphy, the Board of Fire Commissioners as well as from the various officers and men comprising the paid and volunteer department for the very efficient manner in which they have performed their several duties.

I again extend my grateful appreciation to the president and members of the Board of Fire Commissioners and all other departments in the city government for their co-operation during the past year.

Respectfully submitted,  
**RODNEY A. CHIPP,**  
Fire Chief.

Dated Kingston, N. Y.,  
December 31, 1923.

## OUR DAILY PATTERN.

4196. The little doll mother may not only make dolly's clothes but also the doll, from the models supplied herewith. The body may be of drill, unbleached muslin, oil cloth or satin, with a stuffing of bran, kapok or cotton. Eyes of shoe buttons, nose and lips of yarn or, the features may be embroidered or painted.

Dressed as a clown, this doll will be very attractive. The suit may be of calico, cretonne or scraps of silk or satin. One or two colors of materials may be used. For the tamper, cretonne or gingham is pleasing. Dolly will be so glad of the dear little pockets in her tamper, and "Pierrot," the clown, will do all sorts of tricks in his comfortable costume, if his arms and legs are fastened so as to be movable.

The pattern comprising the doll and the garments is cut in 3 sizes: Small, 12 inches; medium, 16 inches; large, 20 inches in length. The doll requires for a medium size 1 1/2 yard. The tamper, 3/4 yard. The suit and hat, 1 1/4 yards of 27 inch material.

A pattern of this illustration mailed to any address on receipt of 12c in coin or stamps by the Pattern Department, The Freeman, Rondout, N. Y. Be sure to state the size wanted.

## Catalogue Notice.

Send 15c in coin or stamps for our up-to-date fall and winter catalogue, containing 550 designs of Ladies and Misses' and Children's Patterns, a concise and comprehensive article on dressmaking, also some points for the needle (illustrating 30 of the various, simple stitches), all valuable hints to the home dressmaker.

**Nervous Men**

You probably know that Cod Liver Oil is the greatest food producer in the world. Because it contains more vitamins than any food you can eat. You'll be glad to know that Cod Liver Oil comes in sugar-coated tablets now, so if you really want to put 10 or 20 pounds of real health, flesh on your bones and feel good and strong ask any druggist for a box of McEoy's Cod Liver Oil Tablets. Only 60 cents a box and if you don't gain five pounds in 20 days your druggist will hand you back the money you paid for them. It isn't anything unusual for a person to gain 10 pounds in 20 days.

**Did It Ever Occur to You**

That price is not the first thing to be considered in a job of printing? Throwing type together in a haphazard way does not require any knowledge of the printing art. That isn't the kind of work you want. But a photograph in a magazine and advertising reflects credit to any concern. Our knowledge of printing gained by long experience enables us to produce

Attractive Printing for Every Purpose  
Don't order anything in this line until you call on us.

**Gold at Bottom of Sea.**  
It is estimated that a total of \$6,000,000,000 in gold went to the bottom of the seas during the four years of the World War, sent there by torpedoes and other devices.

**The Tasmanian Devil.**  
The Tasmanian devil (Sarcophilus harrisii) is a creature in size like a badger, in appearance like a bear. It is ponderous, powerful, dark-colored and covered with a coat of long fur. It sleeps by day and seeks its prey by night.

## PLAN TO BLOW OUT DISEASE

British Doctors Will Use Trade Winds Against the Mosquitoes of Samoa.

Pacific trade winds will be used in an attempt literally to blow disease out of the Samoa Islands, according to plans of Dr. Patrick A. Buxton, leader of the expedition of the London School of Tropical Medicine, which recently set sail for the South Seas. Tuberculosis and other diseases threaten the extinction of the natives of the Samoa group of islands and it is thought their susceptibility may be due to a condition caused by a fly parasite carried by the Stegomyia mosquito. This mosquito does not seem to be able to exist where the sea undergrowth is cut down. By using breezes through the dense jungle so that the Pacific trade winds blow through it, it is hoped that the insects will be blown away. An insidious attack, which will also include substituting modern elements for the hollowed coconut storage tanks which furnish breeding places for the mosquitoes, will be made first in one of the small islands of the group. The expedition is expected to be in the islands for two years.

## DISLIKE THE SMALL PANES

Window Cleaners Would Rather Work Near Tops of the Tallest Skyscrapers.

Whatever else may be said of Washington square it may be truthfully chronicled that it is the hubbub of the window cleaners, that race of men who nonchalantly pose on window sills at dizzy heights while you hold your breath in incredulous horror.

Any window cleaner in the city will tell you that he would rather wash the panes of the highest floor of a skyscraper than go to the most modest of Washington square or Greenwich Village apartments to work, says the New York Sun and Globe.

## A Queer Creature.

One of the queerest creatures imaginable in the midwife road. The female lays her eggs in long streamers, and the male collects and wraps them in his legs. He carries them in this way until they hatch into babies.

## Modern Quarrying.

The quarries of a Vermont company produce every year more than 1,000,000 cubic feet of stone. In the early days the quarrying proper was done largely by manual and animal labor. At present, four hydro-electric power stations, supplemented by two steam-driven generating stations, when necessary, supply the power to run all the machinery in the quarries. One especially interesting application of electricity is seen in the "gang saws," that saw the giant blocks of marble into slabs of varying thickness. The slabs are made of soft iron one-eighth of an inch thick and four inches wide and are toothless. Small pumps deliver a mixture of sand and water to the saw and the sand does the cutting. There are at the quarries more than 300 of these electrically-run gangs which work in groups of from five to forty-three.

## Discovery of X-Rays.

The property of X-rays to penetrate solid matter was discovered by accident through leaving a key on top of a desk beneath which photographic plates were kept. When the plates were developed the shadow of the key was seen.

## German Expert Reports That the Cutting of the Nerve Fibers Ends Acute Pains.

Numerous statements relative to the relief by surgical operation of a heretofore almost intractable disease—angina pectoris—have appeared recently. Patients who suffered with the severe pains around the heart associated with this condition, are usually treated by the use of sedative drugs and physical methods; the relief is, however, temporary and recurrent attacks cause great distress and prevent those afflicted from following their usual occupations, says Hygien.

The new surgical methods are based on the suggestion of a German physician that the pains are conducted by nerve fibers which are accessible to the surgeon, and that relief might be secured by dividing these fibers. One German surgeon reported that he had performed the operation in six cases with excellent results. The cutting of the nerve caused a cessation of the pains, although it was not clear whether this result was due to a fall in the blood pressure or to a loss of sensibility in the parts.

Last February two American surgeons reported the results of the use of this surgical method in five cases. Death occurred in one case, and marked improvement resulted in the four remaining cases. Cases have continued to be reported both in the American and the foreign medical literature.

Some physicians have questioned the use of the method on the grounds that the pain was a warning signal which caused the patient to lead a conservative life. The field appears to be promising but is still strictly on trial.

## Automatic Storm Signals

Mechanical Device Gives Warning to Electric Light Stations by Ringing a Bell.

The passage of a summer storm cloud over a great city means that there will be a very large demand upon the electric light stations for increased current, says the Providence Journal. If the power and light generating station was not prepared for this call the industries of the locality would be greatly hampered and the complaints would be overwhelming, so that these situations must be anticipated.

Until recently it has been the custom to keep on the lookout for storms by paying an observer on the top of the building and upon the approach of a threatening cloud the alarm would be given and the fires under the boilers would be forced, additional generators thrown into service and other preparations made to meet the emergency, and under the old system these preparations entailed considerable work in the way of notifying different departments, some located at some distance, by a rather elaborate system of calling or signaling.

Recently a mechanical means of accomplishing this has been arrived at. A little device near the desk of the superintendent detects the approach of a storm and gives the alarm by ringing a bell, instantaneously at first and later more insistently, whereupon the superintendent gets up and going to the other end of the room moves a lever two and touches a few electric buttons and the whole system has been shifted to get ready for a storm.

## Mussolini Aims Plan to Develop at Latin Bloc Roosevelt Park

Dickers With Spain, Portugal and Brazil For Treaty of Commercial Control of Mediterranean and Expansion in South America.

By Telegram to The Freeman.  
 London, Jan. 9. - Informal diplomatic conversations are proceeding between Rome and Madrid regarding the proposed "Latin Entente" but so far the plan has taken tangible form, said a dispatch from Rome today.

Great Britain has taken a neutral stand, British officials believing the creation of a "Latin Bloc" will not have a disturbing influence upon international affairs.

Premier Benito Mussolini, of Italy, is credited with originating the idea. It is understood that it was approved by both King Alfonso, of Spain, and General Primo Rivera, head of the directory government at Madrid.

The original plan called for a commercial alliance embracing Italy, Spain, Portugal and Brazil. Later it was suggested that Argentina and Mexico might be taken in. One of Mussolini's per projects is commercial control of the Mediterranean and expansion of Italian trade in South America and Mexico.

If an agreement is reached favorable to the interested powers it will be entirely commercial in scope and will contain nothing of a military or naval character.

France's attitude towards the proposed "bloc" has not been officially announced. But it is known that Paris would be averse to Mediterranean control being vested entirely in the hands of Italy and Spain. This viewpoint on the part of the French makes it possible that France eventually may be invited to join and will accept.

It was reported that, if the bloc is consummated, the signatory powers might withdraw from the League of Nations.

The projected Latin bloc would be another step in the realignment of the powers. European nations are now in two groups:

First, The Entente cordiale, including Great Britain, France, Belgium and Italy.

Second, The Little Entente, comprising Yugoslavia, Czechoslovakia, Rumania and Poland, backed up in a military sense by France and Belgium.

Russia, Germany, Bulgaria, Greece, Spain, Portugal, Switzerland and Turkey have no alliances. There is a loosely knit agreement among the Scandinavian nations.

All member nations of the League of Nations are obligated to deposit copies of new treaties with the league secretary at Geneva. If the Latin powers enter into a definite bloc they would be expected to deposit the covenant at Geneva so that the contents would be known to the public.

At the annual meeting of the Roosevelt Park Association held at the office of the company, 261 Fair street, Tuesday, January 8, Schuyler C. Schultz was elected president and treasurer for the year 1924, John J. Cuneo, vice-president; H. L. Thompson, secretary and assistant treasurer. It was reported that plans were being prepared for the curbing of Roosevelt avenue, which is practically an extension of Foxhall avenue from Albany avenue through Roosevelt Park, and for the setting out of oak, maple and evergreen trees along the avenue in the spring, and that later the work of similar improvements along Harding, Madison, Wilson and Jefferson avenues would be taken up. Secretary Thompson reported that several plots had been sold and that there was a growing demand for others with every indication that during the year scores of plots would be sold. Roosevelt Park as has been announced is located along Manor avenue, Kierstedt's Lane and Albany avenue, the old Ulster county fair grounds being embraced in the holdings of the association, all being within the city limits.

### THE STUDIED SIMPLICITY OF THE BLOUSE.

(By Eleanor Gunn.)

From Paris comes the report that specialty shops are trying to interest their clientele in high collared blouses by displaying models with new collar treatments, but so far the open neck style, a little more round than the bateau neck of late seasons, seems to lead in favor.

In America the Peter Pan collar or modifications of this style are chiefly exploited in more severe waists, although the round neckline is sometimes presented as well as the plain neck and cape back. A tendency toward the collar of boyish line is distinctive of this season's semi-tailored blouses, the outline of the blouse suggesting the same line. The link cuff is frequently used, and linen cuffs and collar are often combined with a crepe de chine.

Jersey was popular in the semi-tailored blouse, while alpaca was one of the first cloths employed for this type of waist.

Pongee seems to be coming to the fore in less expensive waists, the overblouse type being most frequent. Narrow bandings of finely pleated soft material are a frequent elaboration.

English broadcloth is still an important material in the cotton blouse, frequently developed into tuck-ins as well as overblouses, although the sports shirt is the most frequent mode employed in this cloth. Some handmademes are offered in the better merchandise, the elaboration as a rule confined to hemstitching.

The blouses sketched indicate a preference for the apple line and a simple neck treatment and long sleeves.

## OVER 90% OF ONE MILLION STILL IN SERVICE

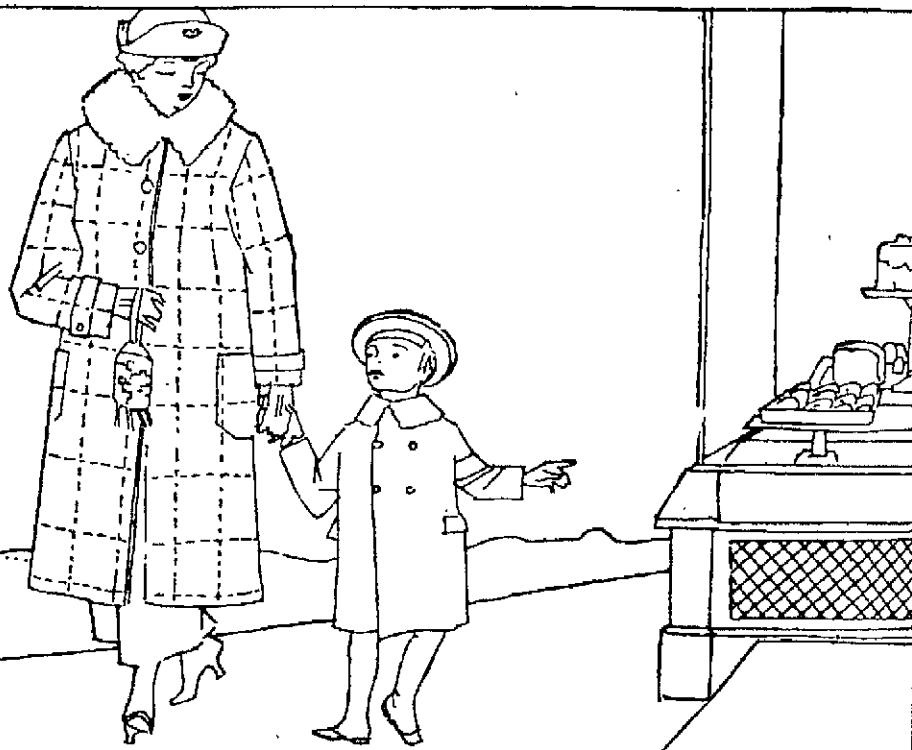

Since delivering their first car, early in December, 1914, Dodge Brothers have manufactured and sold one million motor vehicles.

Over 90% of all these cars are still in active service.

This striking fact stands alone—a unique and overwhelming tribute to the principles and methods responsible for a product of such enduring worth.

### BIG CONCRETE PLANT AFLOAT

Interesting Mechanical Contrivance for Use in Great Lakes Harbor Improvements.

Among the interesting mechanical sights on the Great Lakes is a complete concrete plant afloat. This has been used in important harbor improvements, and the plant has a capacity of 150 yards a day. It rests upon a scow, which is easily run alongside of the cribs on which the concrete dock is to be built. The concrete is poured into the forms from one end of the scow.

At the forward end of the scow are separate divisions for crushed stone and sand. A whirle located just to the rear of these is used to lift the stone and sand to the mixer. The cement is kept in a house to the rear of the whirle, and is raised to the mixer by means of an elevator. To the elevator it is loaded and unloaded by hand. Power to operate the machinery and to furnish electric light is supplied by an upright engine.

## THERE WERE 604 BIRTHS AND 555 DEATHS IN CITY DURING 1923

Annual Reports of Officers of Board of Health Submitted at Meeting Tuesday—All Milk Dealers Met Required Standard During Past Year—Quality of Milk Sold Here Improving.

A number of interesting facts and figures will be found in the annual reports of the officers of the board of health which were submitted Tuesday evening at the first meeting of the year of the board. The reports show that during 1923 there were 604 births and 555 deaths reported in Kingston.

The average count of the milk dealers during 1923 show that all of the dealers met the required milk standards of the board.

Dr. Harold Clarke, food and sanitary inspector, in his report states that the quality of the milk supply of Kingston has been steadily improved during the past year.

The reports, which were read and filed, follow:

### Report of Secretary and Registrar.

Births reported, 604; deaths reported, 555. Non-residents, 113; stillbirths, 27. Birth rate per M, 19.8; death rate per M, 14.31 (non-residents and stillbirths excluded). Infant mortality rate per M, 109.5.

### Corresponding report 1922—

Births reported, 583; deaths reported, 538; non-residents, 139; stillbirths, 28. Birth rate per M, 20.3; death rate per M, 14 (non-residents and stillbirths excluded). Infant mortality rate per M, 89.6.

Causes of death—Heart disease, 113; apoplexy, 55; pneumonia, 17; tuberculosis, 41; cancer, 39; nephritis, 28; post-operative, 28; senility, 27; premature birth, 26; accidental deaths, 21; arterio sclerosis, 14; enterocolitis, 6; marasmus, 6; diabetes, 5; malformation, 5; intestinal obstruction, 5; suicide, 5; acute indigestion, 4; meningitis, 4; convulsions, 3; bronchitis, 3; bullet wound, 3; typhoid fever, 3; diphtheria, 2; eclampsia, 2; angina pectoris, 2; influenza, 2; pernicious anaemia, 2; appendicitis, 2; cirrhosis of liver, 2; external violence, 1; Addison's disease, 1; alcohol poisoning, 1; child birth, 1; ulcer, 1; scarlet fever, 1; ovarian cyst, 1; tetanus, 1; myelitis, 1; gangrene, 1; encephalitis, 1; total, 528.

### Stillbirths, 27.

Deaths by ages—Under 1 month, 34; under 1 year, 24; 1 to 5 years, 15; 5 to 10 years, 7; 10 to 20 years, 20; 20 to 30 years, 40; 30 to 40 years, 32; 40 to 50 years, 56; 50 to 60 years, 53; 60 to 70 years, 59; 70 to 80 years, 100; 80 to 90 years, 39; over 90 years, 9; total, 528. Stillbirths, 27.

### Annual Report of Public Health Nurse.

Number of visits to diphtheria cases and carriers, 120; to scarlet fever cases and carriers, 77; to typhoid fever cases, 70; to chicken pox cases, 78; to measles cases, 297; to mumps cases, 2; to whooping cough cases, 53; to smallpox cases and contacts, 206; number of miscellaneous visits, 87; number of visits to

midwives, 5; number of follow up visits to children attending immunization clinics, 91; birth certificates delivered to mothers, 27; assisted with the following number of vaccinations, 1931; assisted with the following number of toxin-antitoxin injections, 1587.

### Annual Report of Food and Sanitary Inspector.

Cattle inspected at slaughter, 658; parts condemned and tanked, 153; milk dairies inspected, 403; farms inspected, 19; farms dairies inspected, 19; cans of milk inspected, 491; cans of milk rejected, 75; inspections of food establishments, 811; complaints received and investigated, 180; complaints referred, 13; reinspections, 36; no cause for complaint, 32.

### Annual Report of Plumbing Inspector.

Master plumbers registered and conducting business, 31; plans received and approved in new buildings, 103; plans received and approved in old buildings, 93; sewer a-a cesspool permits issued, 160; sewer connections supervised, 135; cesspools built, 25; water tests, 97; first inspections, 368; final inspections, 440; re-inspections, 20; yard vaults, 11; Number of fixtures installed—Sinks, 275; water closets, 305; shower baths, 5; bath tubs, 220; trays, 207; basins, 221; urinals, 4; refrigerators, 7; bar fixtures, 2; floor drains, 17; fountains, 2; total, 1,265.

### Communicable Diseases.

Diphtheria, 1923, 1922, 12, 42; Measles, 1923, 1922, 196, 172; Scarlet fever, 1923, 1922, 22, 47; Typhoid fever, 1923, 1922, 26, 11.

Tuberculosis sputum, positive, 33; negative, 78; total, 111. Malaria smears, positive, 1; negative, 5; total, 6. Typhoid fever, intestinal discharges, negative, 12; total, 12. Water examinations (bacteriological), 22; total, 1957.

Urinalysis—Qualitative chemical, 2287; quantitative chemical, 205; microscopic, 2287; blood counts, 198; stomach contents, 4; discharges, pus, etc., 61; intestinal discharges, 18; autogenous vaccines, 14; pleural fluid, 7; animal autopsies, 1; miscellaneous examinations, 4; total, 5089; grand total, 8119.

No charge cases, 116; value of work done, \$1,752.50; amount collected, \$1,585.00; public health outlays distributed in county and city, \$500; total increase of work done at laboratory over 1922, 2246; total increase of laboratory receipts over 1922, \$230.50.

### The Milk Report.

The average count of milk dealers for 1923 follows:

### Grade B Raw.

Not more than 200,000 bacteria per c. c. allowed.

Adin, 70,327; Babcock, 34,909; Barton, 88,099; Beatty, 28,026; Black, 78,672; Boice, 15,520; Boulevard Orchard Farm, 73,850; Browne, 89,181; Cassidy, 51,372; C'low, 30,715; Cook, 104,866; De Forest, 59,727; Del Rio, 46,750; Diamond, 92,657; Finch, 68,018; Finger, 69,330; Glenhurst, 54,400; Grant, 63,866; Hardman, 52,020; Holst, 33,800; Joyce, 12,000; Kingston Milk Exchange, 60,520; Krom, 53,290; Lieb, 62,309; L. McSpirt, 89,251; P. McSpirt, 85,490; Modica, 67,860; Parish, 17,672; Port Ewon Dairy, 52,000; Rondell, 40,700; Thompson, 105,285; Van Valkenburgh, 10,500; Vredenburg, 49,500.

### Grade B Pasteurized.

Not more than 100,000 bacteria per c. c. allowed.

Kingston City Dairy, 16,200.

### Grade A Raw.

Cows tuberculin tested, not more than 60,000 bacteria per c. c. allowed.

Brabant Farm, 24,872.

### Certified.

Cows tuberculin tested, not more than 10,000 bacteria per c. c. allowed.

Uisterdorp, \$966.

### Dr. Clarke's Report.

Dr. Harold Clarke submitted the following report: By the continued help and co-operation of the milk producers and milk dealers, the quality of the milk supply of the city has been steadily improved. It is hoped that by further help and inspection that greater care may be exercised in the production, storage and carriage of milk, thereby assuring to the customer a product of better flavor and one that keeps sweet longer. The more liberal use of ice is to be constantly advised to all those engaged in the production of milk and its products. A very vital question of the retail end of the milk supply of the city is whether the Board will continue its previous policy of permitting a dealer but one grade of milk or whether it will modify this ruling. Requests are already before your inspector on this subject.

While the inspection of cattle at slaughter has always been a grave problem in this city it is felt that the grade of cattle being brought into the city has improved to a great extent. This in turn tends to show a more nearly healthy lot of cattle on the killing floor. On the other hand the increase in tubercular testing of native dairy cattle has led to the culling out of many suspects who find their way to slaughter. This requires a constant vigilance upon the part of your inspection service. It is firmly believed that the ultimate destination is a centralized slaughterhouse under adequate inspection.

The Federal law and parts of the State law provide very specific definitions for cold storage products. The power to enforce these laws is, however, delegated by the statute to specific enforcement agents such as representatives of the Internal Revenue Department; inspectors of the United States Department of Agriculture; or specifically deputized agents. For this reason on the part of some retailers of meat and fish the cold storage regulations are flagrantly violated. This practice has become so great that it is called to your attention for such consideration as may be deemed necessary.

Following action of the Board whereby the control of garbage collection was vested in the Board of Health, a considerable insight into this question has been afforded your inspector. The rapid improvement of the outskirts of the city and the increase in the number of families occupying the older dwellings produce a greater amount of refuse and a much larger area to be covered than ever before. Our present collection methods are entirely inadequate for the demands made upon it; while the manner of garbage disposal is obsolete. It is certain that ere another summer this collection procedure will need a better method of procedure than at present.

## ROAD BUILDING

### Study Science of Roads in Elementary Schools

The automobile industry is showing more than ordinary interest in a bulletin just issued by the bureau of education, Department of the Interior, entitled "Main Streets of the Nation," and intended as a study of projects on highway transport for elementary schools.

Prepared by Florence C. Fox, specialist in education systems for the United States government, it will particularly appeal to the children because their lives are very close to the highway question; good roads playing an increasingly important part in every child's experience.

The bulletin shows the remarkably interesting and practical lessons which have been worked out for elementary grades. In arithmetic, for example, a question such as this is asked: "If the railroad fare from New York to San Francisco is \$138.18, how much more, or less, will it cost to motor through the Lincoln highway than to go by train?" The solution involves problems in the cost of gasoline, the wear and tear of the machine, and the day's living expense en route, as compared with the cost of travel.

In the geography department interesting lessons are presented which afford imaginary journeys over the country's great highways. Important cities are located on the way, and brief essays written about the national points of interest in passing. The bulletin gives in great detail how such lessons may be prepared.

Problems in simple science are brought out by a study of road building, drainage and grading. Lessons in civics are exceptionally interesting and these include problems on financing; how to obtain a right of way; how bond issues are cared for, etc.

An important lesson deals with the safety question. Every parent is interested in this, and the help involved cannot fail to be of help and practical use to the young student in the face of the crowded streets and highways.

### Wisconsin Will Renumber All Its Trunk Highways

Immediately following a conference of the special legislative committee, appointed to select 2,500 additional miles to the state trunk highways, division engineers and the state highway division commission to determine finally what roads are to be added; highway experts will begin work on the enormous task of renumbering all of Wisconsin's trunk highway system.

Almost every trunk highway in the state will have to be renumbered to conform with the additions made by the special legislative committee.

Under the new system there will be fewer short highways and more long highways, with several numbers overlapping each other on the main traveled through routes.

Wherever it is possible highway experts will plot routes direct from important centers. There will be no change, however, in the system or plan of marking the trunk highway system.

All highway maps are to be reprinted and revised following the new allocation of main highways, but this will probably not come until late in the spring. It will make main routes easier to follow, for it will not be necessary to switch off from one highway to the next on a long journey. Motorists will be able to enter the state on one highway and follow that clear through the state or to their destination.

### Large Mileage Is Added to Federal-Aid Highways

(Prepared by the United States Department of Agriculture)

Federal-aid roads totaling 8,820 miles were completed during the fiscal year ending June 30, 1923, bringing the total of federal aid roads completed to 26,536 miles. The mileage completed during the year is classified as follows:

Gravel and drained	1,460.1
Gravel	745.8
Waterbound macadam	2,815.4
Bituminous macadam	452.9
Bituminous concrete	76.5
Concrete	1,449.2
Brick	74.8
Bridges	18.4
Total	8,512.2

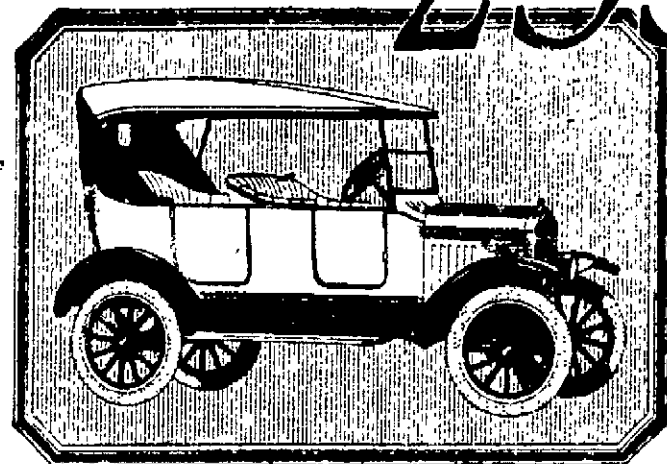

The projects under construction at the close of the year amounted to 14,772 miles and were estimated at 55 per cent complete. In addition to the 26,536 miles completed and the 14,772 miles under construction there were at the close of the year a number of projects approved but not yet placed under construction, the aggregate length of which was 6,017 miles.

### Scheme of Texas Farmers for Building Good Roads

A settlement of wide-awake farmers near Lindsay, Tex., have a scheme for road building. On one farmer's place is a gravel pit that furnishes good gravel in abundance. This farmer furnishes free the gravel for road-building purposes, while the other farmers grade up the roadbeds and do the graveling. When the work is completed it hasn't cost anything except a little time and labor, and there are no taxes to pay.

## The New Touring Car \$295 F.O.B. DETROIT

### A Striking Value—at \$295

Considering the improved appearance of the new Ford Touring Car, one would naturally expect a proportionate advance in price.

Largerscale production, however, has made it possible to incorporate in this new type touring car a number of developments with-

ing its cost to the purchaser. A comparison extending over a long period of years will reveal the fact that the present price is actually the lowest at which the five-passenger open car has ever been sold.

The Ford Touring Car stands today, as it always has, a most remarkable value in the motor car field.

This car can be obtained through the Ford Weekly Purchase Plan.

### The "Unknown Soldier."

Professor Santino, an Italian sculptor, is credited with conceiving the idea of immortalizing the "Unknown Soldier." All the great nations have adopted this memorial idea.

### Retirement.

It is in retirement that one feels the preciousness of genius and friendship as one hears best in the silence of the night the sound of the sea or the song of the nightingale.

### To a Hair.

Patron—"I want the part exactly in the middle." Barber—"Yes, sir! Yes, sir! And where, sir, would you have me place the one hair that's left over?"

### Wickedness.

In acts of wickedness there is nothing greater than that of those who when they deceive, so manage that they seem to be virtuous and upright men.

### X-rays have been put to many uses.

Including the preserving of furs against moths, testing chocolate made by machinery, and killing a microscopic insect which attacks cigars.

### Railway History.

The first railway in England was begun in 1825; in Austria and in France in 1828; in the United States in 1829; Belgium and Germany, 1830; Russia, 1833, and Italy in 1839.

## A Test for Rest—

AFTER the sleepless night, and you wonder about the cause, has it ever occurred to you that it may be caffeine, the drug in coffee, that keeps you awake?

Suppose you try Postum as your mealtime beverage, for at least ten days—

Put it to the test!

At your first sip of Postum, you will understand why, by many, it is preferred equally for its delicious flavor and for its wholesomeness.

Postum is absolutely free from the coffee drug, caffeine, or anything that can cause restless nights or uncomfortable days.

Sold by grocers everywhere!

# Postum

for Health

"There's a Reason"

Your grocer sells Postum in two forms: Instant Postum (in tins) prepared instantly in the cup by the addition of boiling water. Postum Cereal (in packages) for those who prefer the flavor brought out by boiling fully 20 minutes. The cost of either form is about one-half cent a cup.

## CHARITY PATIENT LEFT FORTUNE

of Pair He "Stood Up" for Gets Wealth.

### OF ESTATE SURPRISES

Three-quarters of a century ago in Germany, Louis T. Lehmer was "stood up" as best man at the wedding of his closest friend. Recently he died in Metropolitan hospital on Welfare Island, New York, charity patient, at ninety-two, and one of the aged bachelors, who lived alone on the top floor of the two-story front house he owned, 555 East Fifty-fifth street, gasped in belief when they learned he had left a fortune to charity and another fortune to a girl of twenty-one.

The girl, Miss Elizabeth Rosalia Wurmman, a teacher in Public School No. 6, West New York, N. J., was still pinching herself to make sure the sudden wealth from her father's estate wasn't all a dream.

Surprised at Size of Fortune. For it was the parents of Miss Wurmman's mother, Mrs. Charles F. Wurmman, 25 Reservoir avenue, Jersey City, to whom Lehmer had bequeathed at their matrimonial emulation 75 years ago, and this, she believes, is why he chose her as chief beneficiary.

Mrs. Wurmman and the girl said Lehmer had been a friend of the family since his childhood, and he expected he would remember her in his will. But they were as surprised at the size of his fortune as at the size of his bequest.

He visited Mr. Lehmer frequently," Mrs. Wurmman said, "and he had him taken to a private hospital when I found a policeman sent him to Welfare Island in an ambulance. The doctors refused to let him be moved and that is the only way he died there."

Hates to Wash Dishes. Mrs. Wurmman is a 1923 graduate of Montclair Normal school. She wants to keep on teaching for the present. Her life ambition, she says, has been to travel, but she will not sign to put plans of this sort into execution until next summer, and she wants to "see America first."

"I hate to wash dishes," she said, "but I intend some time to have a house of my own that I have planned myself. But somebody else can do the housework."

She likes to dabble with water colors, she said, and to play the piano and the ukulele. She is an attractive blonde, 5 feet 6 inches tall and weighs 122 pounds. Her father is a bookkeeper for John C. Mehl, 124 West 10th street, Jersey City.

Mrs. Wurmman was made Lehmer's residuary legatee, besides having \$15,000 left in trust for her until she is thirty-five.

Radio "Fading" Explained. The Show Relation to Surface of Air Sixty Miles Above Earth.

Variation in the conducting surface of the air about sixty miles above the earth probably causes the phenomenon known as "fading" in radio transmission, the bureau of standards announced at Washington. Scientists have been working several years to find the reason why concerts, speeches and the like broadcast through the air grow stronger and weaker to the listener. The bureau tells of tests carried out by it and the American Radio League during 1920 and 1921. Its statement says:

In these tests from five to ten radio stations transmitted signals in succession on certain nights, according to prearranged schedules. The signals were received simultaneously at about 100 receiving stations whose operators were provided with forms for recording the variations in the intensity of the signals as received.

The general result of these tests substantiates the theory that the causes or causes of fading are intimately associated with the conditions of the heaviest surface, which is a conducting surface some sixty miles above the earth.

"Daytime transmission is largely affected on by means of waves moving along the ground, while night transmission, especially for great distances and short waves, is by means of waves transmitted along the heaviest surface. Waves at night are thus free from the absorption encountered in daytime, but are subject to great variations caused by irregularities of ionized air at or near the heaviest surface. These variations probably account for fading."

## MINE BLOWS UP AT SEA

Explosives Are Still a Menace to Ships.

Mines scattered over the North sea during the war continue to be washed along the Norwegian coast and, although they have been adrift for four years, most of them are active. One mine exploded recently near the Lofoten lighthouse and threw a column of water 140 feet into the air, the explosion being heard for many miles.

## Fewer Youths in Germany.

According to the German Teachers' Journal of Berlin, the number of persons in Germany under fifteen years of age sank from 45 per cent in 1910 to 35 per cent in 1920.

## Thinnest Thread.

The thinnest thread visible to the human eye is so small that it would make a bundle of a thousand of them equal the diameter of a woman's hair. These threads are made from spider webs.

## RADIO A CURE FOR FLOP EARS

Earmuffs on Receiver Do the Work for Boy Who Was Thus Afflicted.

"Protruding ears will soon be a characteristic of a bygone race," said William. "Mothers of the future need have no fears that their young ones will grow up with flapping auditory organs. The radio will attend to that."

"My boy Junior not so long ago had one of the most pronounced pairs of protruding ears I have ever seen. It was a terrific blow to us. Since the day of his birth we had worked to make him look pretty. My wife before long had visions of his becoming a million-dollar-a-year movie star."

"She overlooked nothing. As soon as Junior had hair long enough to curl she curled it. As soon as he was able to walk she saw that he carried his feet in the approved fashion—almost parallel, the toes pointing slightly east and west. When his new teeth started coming we had the old ones extracted immediately so that he would have a straight, even set."

"Until two years ago his ears seemed to be just ordinary ones. They were not exactly tucked in close against his head, but they were not obstreperous. Then suddenly they started shooting out at right angles. You can imagine the shock."

"When our hopes were at the lowest ebb the boy became a radio fan. For two, three and four hours a day he would sit at his set, the head telephones clamped over his ears. In six months those awful flappers began to improve their shape. In a year the cure was complete. The radio earmuffs had done their work."—New York Sun and Globe.

## BYRON TRIED TO KEEP THIN

Starved Himself to Avoid Corpulency but Had Periods of Excessive Eating.

In "Beau Brummel and His Times" one reads that Byron, "fearful lest he should become fat, starved himself; and then ate and drank to excess upon nights of relaxation." The two preceding days, relates Thomas Moore. Byron had taken nothing but a few biscuits and had chewed mastic to stop the craving of his stomach. One is told, also, that he wrote "Don Juan" on gin and water. Early in 1803 Byron, when only seventeen years of age, already experienced the discomfort and disfigurement of corpulence. He weighed himself regularly at the old coffee mill, 3 St. James street, where for over 150 years eminent people have gone to be weighed.

Byron was absent from England between 1809 and 1811, he having left for the continent July 8, 1809. May 10, 1810, he swam the Hellespont from Sestos to Abydos in emulation of Leander, and, sailing for home July 3, 1811, the poet was met by his friend Dallas at Reddish's hotel, St. James street, on July 15, 1811, the day on which he was weighed for the last time at the old coffee mill. His successor the seventh Lord Byron, was a regular customer at that popular resort—Adventure Magazine.

Another Wave Motor. Professor Trischetto, an Italian, predicts that if his recently invented model is adopted it will make it practical to get power from the waves of the ocean.

The extraction of power from the ocean's movements—waves and tides—has long been the dream of inventors, as such a source of power is practically inexhaustible; but heretofore the models have either been failures or so expensive to operate as to be impractical. Professor Trischetto, however, claims that with his device he can generate ten horsepower from each square yard of ocean surface used.

An interesting sidelight on the professor's invention is the fact that he has been refused aid by his own government and has announced his intention of offering his device to English capitalists when it is perfected.

## Alaskan Eskimo Progress.

In twenty years the Alaskan Eskimos have made great strides in the ways of civilization. They have churches and schools, many of them read and write, and, owing to the reindeer herds that the United States government started for them, most of them are prosperous. Deer meat in the North sells at the rate of nearly \$10 for 100 pounds, which is the weight of the ordinary carcass. The natives now own at least 200,000 reindeer, which are under government supervision.—Cleveland Plain Dealer.

## London Growing Fast.

It has been estimated that the increase of London's population during and since the World war is no less than 900,000. Vast numbers were attracted from the provinces by the lure of plentiful employment and high wages. Now, having acquired the taste for London they do not return, even though employment is not now plentiful and wages are not what they were.

## Explorers Ate Shoes.

Three explorers of the wilds of Northern Canada have made their way back to civilization after two years of grueling experience. They covered more than 4,000 miles, mostly by canoe, overland stages of the trip being made with the aid of a dog team. More than once they were near starvation and once they were compelled to eat their old moccasins, discarded sacks and dried suckers.

## Sagacious Minds.

A powerful and sagacious mind anticipates coming events by forethought, coming to a conclusion somewhat in advance of what may possibly happen in either case, and what ought to be done in that event.

## CURRENT OFFERINGS AT THE THEATERS

The vaudeville bill at the Kingston Opera House played large audiences, at Tuesday's performances. The bill is very entertaining, comprising balancing acts, characterizations and comedy, skits. The bill closes with gymnastic stunts. Bulldog Drummond, the photoplay will again be shown.

At the Keeney Theatre at 10:30 night's performances will be shown for the last times "Anna Christie," a photoplay said to be as powerful as the play. This picture has created very favorable comment throughout the movie world. Thursday, Friday and Saturday at Keeney's will be shown "The Spoilers." The novel by Rex Beach is advertised as "the most popular novel ever written about the far north. Interest in the book, which was published nearly twenty years ago has been revived by the announcement that it was

being filmed by Jesse D. Hampton at the Goldwyn studios. The novel is an all star cast including Milton Sills, Barbara Bedford, Anna Q. Nilsson and others.

The final showings of the Allan Dwan Paramount production of "Zara" which opened at the opera house Monday, will take place there this evening. George Swanson is the star supported by B. Warner, Ferdinand, and others. The story is one of a French music hall, a mad and a great heart appeal. Ben Loring Musical Revue in a new new play, "Bringing up Father." Thursday evening there will be a beauty contest in which prizes will be awarded. The picture Thursday is "Lights Out," something unusual in screen entertainment.

## TARARE'S MUSLIN FESTIVAL

**Thriving Center of Industry for Yarn  
in Eastern France Halls  
Originator.**

Tarare, in east central France, is the city of muslin. It was formerly a little village lost in the Beaujolais mountains, but now it is the center of a thriving industry. For more than half a century it has conducted a worldwide trade in the finest muslin, the secret of making which originally came from India, says the Detroit News. And as a result of that trade

the village has become famous. Each year in honor of Rimont, the founder of the mill, the people celebrate the muslin festival, which calls forth the festive holiday spirit in all of the inhabitants.

Last year the festival lasted three days, in which the little city was truly a city of muslin. Everywhere houses, balconies and facades all but disappeared under the light and colorful decorations, which were always pretty and sometimes ingenious. Above the middle of the streets were suspended domes from which long streamers of muslin were draped in graceful curves to the second floor windows of the houses; reseda, cream, ivory and rose predominated—gray and beautiful color

flowers like garlands of flowers hanging from immense corals. Vehicles of all kinds were adorned with fancy models.

## QUARTER THE MINIMUM TIP

---

Check Men Have a Scheme to Export More Money From Coast Owners.

"There's no limit to the ingenious inventions of these tip bounds," muttered the occasional theater-goer, the

"What now?" his friend inquired.

"Yesterday I took in a matinee at the new theater and the evening performance at another. At both I checked my overcoat and stick. It cost me a quarter at each place, instead of a dime, because of their latest unmerciful stunt.

"The check men used to take the tips in their hands or receive them in a little deep dish. In either case you could make your contribution a dime without shaming yourself before anyone but the receiver himself. If the cashiers were there, you ostentatiously cast the coin in with the rest of them and nobody noticed what it was. If

"But now they would accept nothing at a quarter. Before the end of the act they put three or four quarters on the ledge. Tips, they indicate, are to be laid alongside these. What is a man to do? One puts down a quarter and all the others have to follow suit. If a courageous chap contributes only a dime the check man immediately whisks this bad example into his pocket."

**Odd Uses for Motor Cars.**  
Odd uses to which motor cars may be put are described in Popular Science Monthly.

**J. M. Schofield** of Stockton, Cal., has a small touring car to help him dig wells. On the way to and from his car pulls a four-wheel trailer loaded with more than a ton of dig-

E. W. Tee of Brooklyn, N. Y., uses a car to prevent the water supply in his country place from running

port. He raises the rear end of the car, removes a tire, slips a belt over the rim, and operates a pump until the tank is filled.

Amuel D. Lamis of Hannibal, N. Y., uses his car to haul a mowing machine when the time comes to cut hay on his farm.

oolmaster and who at the time was  
ing a class of very small boys in  
ish grammar. On the board he  
written the sentence, "The toast  
drank in silence," asking the class  
correct any mistake they could find  
t. For some moments there was  
response, but finally a youngster  
up his hand and at a nod from  
master stalked gravely up to the  
blackboard to make his correction.

## Yonkers Plays Here Tonight

This evening at the local armory court the Kingston Metropolitan League team will play the Yonkers quintet. During this second half race the Kingston representatives have played two games losing one to Yonkers at the latter's court by a 23 to 21 tally.

The Yonkers club will probably line-up with Marion and White in front, Malone at center and Grinstead and Wassmer in the guard positions. Kingston will have a number of players to pick from. Starting the game C. Husta and C. Powers will be in front, Anderson center and Artus in the guard assignment. Either Doc Newman, Campbell, Tome, or M. Husta are eligible for the other guard position.

The game will be called at the usual hour with dancing following the contest.

In the preliminary game Battery E plays the Peerless Five.

Movie at Eddyville. There will be a moving picture Friday evening at the Eddyville M. E. Church at 7:30 o'clock.

## Eases Pain of Rheumatism—

It is unnecessary to suffer those stabbing pains. You can get relief quickly. Apply Sloan's gently without rubbing. Instantly you feel a comforting glow. The pain eases off. Relief comes. Get a bottle from your druggist today—35 cents. It will not stain.

Sloan's Liniment—kills pain!

## Gibbons Next to Meet Dempsey

Business is begun of building up demand for bout in N. Y., Where "Sap Money" is plentiful, in May—Then Firpo.

(By Davis J. Walsh.)

65 Telegraph to The Freeman. New York, Jan. 9.—Jack Dempsey and Tom Gibbons will meet in a New York ring, 15 rounds to a decision, for the world's heavyweight championship some time during the final week in May. That much is in the bag. Slight details, such as Dempsey's share of the purse, the site of the bout and the possibility of political discountenance of all things pugilistic in the meantime, must be cleared up but it is almost certain that Tex Rickard will be the promoter.

Gibbons is to be the opening number on Dempsey's calling list next summer. Lou Firpo and Harry Wills the other two. Firpo will be met on or about July 1 and Wills on Labor Day. That is the program. Rickard, however, must still be won over to Gibbons as an opponent for the championship and a few adolescent steps in this direction will be Tommy's scheduled bout with Fanny Fred Fulton and extravagant rumors of a Dempsey-Gibbons match in St. Louis, Cleveland, Louisville and all points west. Both fighters are keen on New York as the scene of the bout for obvious reasons. Most of the sap money is here.

Talk of holding the fight in the West will only serve to garnish the newspaper headlines and make the project more desirable in the eyes of the New York customer. Nothing is valuable here until some one else wants it.

It is possible that Gibbons may be brought on to New York for several appearances at Madison Square Garden in order that the public may become better acquainted with the man who duffed 15 rounds with Dempsey at Shelby last July, the only challenger to stay the limit with Dempsey since that two-handed gentleman became champion. A Gibbons-Tommy bout to replace the now defunct Tommy-Spalla affair, is one of the possibilities of the winter season.

Jack Kearns, of course, is sitting tight on the situation, beyond admitting that Dempsey and Gibbons are virtually agreed that a date in May would be quite acceptable. For Firpo and Wills, he seemed to have no immediate plans, although he declared that Dempsey expected or hoped to meet them in the order named before next fall.

"My plans we might make for a Firpo bout must be held up until he arrives in this country," Kearns declared. "Dempsey, as I have said a million times, is ready to meet any man at any time and place where conditions are satisfactory. I have my own idea as to when Dempsey and Firpo will meet again but that is not for publication at this time. There is absolutely no use in anticipating the situation. I think you can say, however, that Gibbons is almost certain to be Dempsey's first opponent in a championship bout this year.

As for Wills, there is nothing I can add to what I have already said. If it is at all possible to take him on we are for it. But the matter rests in hands other than mine."

## NEWBURGH TO BOWL LOCAL ELKS TEAM.

The Newburgh Vikings will bowl a series of six games with the Elks' Bowling Club of this city, starting Friday night at the Elks' alleys here. Considerable interest is shown here over the coming match for they view the coming of the Vikings as an opportunity of witnessing the play of strong contenders for the state championship. The Vikings will use A. Gerken, MacMorran, Hopshe, W. Gerken, Havens and Hunt, while the Elks will have Cashin, Vogel, Sapp, Hymes, Emerick and Schirick.

## Fighting Fishes.

Prize-fighting fishes are very common on the coast of Japan and Siam. Their pugilistic tendencies are most pronounced, so much so that the natives make them take the place of boxers in Siam, and arrange matches in glass bowls between two of the species, heavy bets being laid on the result.

"Scribes" Used to Be Fighters. A scribe was a name used among the Jews originally to indicate a military officer, but later the cognomen was given to those who copied the books of the law.

January two-two, Tuesday—For you to remember—Kingston Shriners' Dance and Entertainment At the Armory.

\$10.00 Worth for ..... \$8.00  
\$100.00 Worth for ..... \$80.00  
\$1,000.00 Worth for ..... \$800.00

Always at Eighmey's—More and Better Merchandise for Your Money.

ALL SALES CASH. NO GOODS ON APPROVAL.

## Happenings in the Met. League

Several Players Purchased—Teams and Players Fined—Brooklyn Out For Second Half Honors.

Brooklyn is apparently continuing in the second half of the Metropolitan Basketball League season in the same fashion that marked its efforts during the first half. Managers Donlon and Ross, of the speedy youngsters from Prospect Hall, have made their players an especially attractive inducement in the form of a fat bonus to leave no stone unturned in the way of capturing first place in both halves of the season, and judging from the two games already unrecorded by the Brooklyn combination, it looks as if the players are out to make the bonus an early certainty.

Several important purchases of players have been made during the past week with a will tend to materially strengthen the entire roster of clubs for the second half far greater than could be imagined early in October at the start of the season.

Joe Dreyfus has been taken over by Paterson from Brooklyn, so that now the former champions have the two guards selected last season by one of the newspaper writers as the two all star defensive men of the Metro wheel. George Norman, let out by Paterson, has been signed by Yonkers, who finally appear to have a better representative group of stars than even before. Hank Thomas has been secured by Greenpoint from Kingston, and as the North Siders have been greatly in need of a fast young forward to work with Riccoda, his acquisition should be extremely helpful. Anderson, a new pivot man, who was signed by Kingston a week ago, has already proved a hit in the up-state city, where his great playing was largely responsible for the defeat of Trenton in the opening game on New Year's night. Roy Steele, captain of the great Camden Eastern League team, has also been added to Paterson's list.

Jimmy Campbell of Kingston, who has been under suspension for the past two weeks, has had the ban lifted on his promise and the depositing of a substantial cash forfeit with President O'Brien that he would appear in all the road games of the Kingston team hereafter.

The coffers of the league treasury were enriched last week by the signing of Yonkers for appearing at Paterson with an unregistered player in the lineup, the firing of Benny Bogman for appearing in Brooklyn on Sunday evening, December 30, in an exhibition game against league rules, and the firing of Trenton for appearing at Kingston with two fictitious men in the lineup.

## Standing of Clubs.

	Won	Lost	Pct.
Brooklyn	2	0	1.000
Yonkers	1	0	1.000
Trenton	1	1	.500
Paterson	1	1	.500
Kingston	1	1	.500
Greenpoint	0	3	.000

## Schedule for This Week.

Friday, January 11—Greenpoint at Trenton.  
Saturday, January 12—Trenton at Paterson; Brooklyn at Yonkers.  
Sunday, January 13—Yonkers at Greenpoint; Paterson at Brooklyn.

Just Like a Man. Seeing that he cannot discard most of his bad habits, man seeks to justify them.

## Breaks Decide Games

When two evenly matched teams meet in any line of sport, the breaks of the game invariably decide the issue. This fact is proved out every year in the world series and has held up in the big football games of the present season. A fumbled ball, a bad kick or a poor bit of judgment has decided many a game this fall after the two teams and played each other to a standstill and a tie game seemed certain.

## AARON WARD WOULD BE TURNOVER HITTER

Ambition of Yankee Keystone Sacker to Hit Both Ways.

Aaron Ward, second baseman of the champion Yankees, is ambitious to become a "turnover" batsman. A "turnover" batsman is one who hits from either side of the plate, shifting his position to the style of pitching he is facing.

Ward always has batted as a right-hander. He is now experimenting from the other side of the plate and he is certain he will be able to improve his hitting many points when he can, with equal efficiency, change his position to suit the pitching.

Once during the last western trip of the Yankees Ward attempted to make the change, but Manager Huggins believed that the experiment might be too costly in the midst of a pennant race that had not yet been won. But while the Yankees were playing exhibition contests, Ward took advantage of the opportunity and batted left-handed.

"Of course, I am still crude in my efforts," said Ward when speaking of his attempt to change his batting style. "It may take a long time, but one thing that impresses me in my trials is the fact that I am able to see the ball much quicker and more clearly when I bat from the left side. I don't know why this is, but it is true. I am not able to swing with the same accuracy, nor put the same force in the blow as I now do batting right-handed, but I feel certain that this will be remedied when I have become more accustomed to the new style. I intend to continue the experiment until I have either mastered it or make a failure of it. But I am certain that I will succeed."

## Italy Leads in Lemons.

The bulk of lemons entering into world trade are from Italy. Her exports in both 1920 and 1921 were approximately 4,000,000 boxes, which was about half the pre-war figure of 8,000,000 boxes. Imports into the United Kingdom amounted to 1,000,000 boxes in 1921, as compared with 500,000 boxes in 1920 and 500,000 boxes in 1918. After the United Kingdom, Germany and the Netherlands are the heaviest importers of lemons.

At Least Two Kinds. Even when only sandals were worn, there were the "swell" kind and the clodhoppers.

## Reds Get "Dud" Smith

Byron "Dud" Smith, law student at St. Ignace university, and the leading hitter in the San Francisco Mid-winter league, has signed a contract with the Cincinnati club of the National league. Smith has a batting record of .600. He bats right and left-handed and is a great base runner.

## Coach Keene Fitzpatrick

## Lauds Modern Football

Keene Fitzpatrick, the trainer of Princeton athletes, says that the aerial football game that is being played now has done more to make the sport develop as it has than any other single factor.

"A Tale-Princeton game today in my mind far surpasses the exhibitions in the days when huge tallies, drawn up behind the ropes, served as stands in the old Manhattan park at New York, where the Tiger and the Bulldog used to meet," said Fitzpatrick. He is of the opinion that punting and passing not only have given the players themselves a much better opportunity to make use of individual ability, but that from the view of the spectator, the interest in the game has improved vastly.

In concluding, Fitzpatrick said: "Without a doubt, football is the national college sport of today. One of the main reasons why it has grown to be this is because it is so distinctly amateur."

## Indians Enjoy Big Bat Sprees in 1923 Campaign

Only one other club in the American league went on as many batting riots as the Cleveland Indians during the 1923 campaign. The Indians won 10 games in which they scored 10 runs or more, but so did the Yankees, but where the Indians were beaten in 17 such battles, the Yanks dropped only seven, three to Cleveland, two to Detroit and two to St. Louis.

## Water Bags of Indian Army.

The water is carried in goatskin bags in the Indian army because the religion of the various soldiers interferes with the use of any other kind. The Mohammedans cannot drink from a bag made of pigskin, and the Hindus cannot drink from one of calfskin.

## The Coats

Every ladies' and children's coat has been reduced from 33 1-3% to 50% which prices will prevail during this sale. Should we just take off 20% we would not be giving as low a price as now. Following are the extremely low coat prices:

\$7.50... values \$14 to \$18  
\$9.97... values \$18.00  
\$17.00... values \$25 to \$29  
\$23.97... val. \$32, \$35, \$39  
\$31.97... value \$49.00

## CHILDREN'S COATS

\$3.75... values \$4.97  
\$4.97... values \$6.50, \$6.97  
\$5.97... val. \$8.50, \$6.97, \$9.50  
\$7.97... value \$10.97, \$12  
\$9.97... values \$14., \$18

## Relieves Headache

A little Musterole, rubbed on forehead and temples, will usually drive away headache. A clean, white ointment, made with oil of mustard. Musterole is a natural remedy with none of the evil after-effects so often caused by "internal medicine."

To Mothers: Musterole is now made in milder form for babies and small children. Ask for Children's Musterole. 35¢ & 65¢ in jars & tubes; hospital size, \$2.
